Git / GitHub, Google Apps Script

CERTIFICATIONS

Google Ads Search Certification

Unix Essential Training

SUMMARY

Software engineer who climbed from intern to Solutions Engineer in under two years at a large digital agency. A fast learner across new stacks who owns projects end to end — spanning full-stack development, marketing technology, and server infrastructure.

EXPERIENCE

Custom Design Partners — Jacksonville, FL

Aug 2024 – Present

Solutions Engineer · promoted twice in 18 months (Intern › Junior › Solutions Engineer)

- Architect full-stack sites for a large client portfolio (100+) — WordPress, Shopify, PHP, JavaScript, REST APIs.
- Leading an ongoing migration of 100+ client sites to in-house Linux servers (Nginx, Apache, cPanel) — cutting hosting costs and load times, with more still underway.
- Automated intake & project management with n8n + OpenAI API (Jotform, Google Sheets, Asana) — ~15 hrs/week saved.
- Built GA4, server-side tagging & e-commerce analytics; ran penetration testing to remediate vulnerabilities pre-launch.

Batteries Plus — Jacksonville, FL

Mar 2022 – Present

Trusted Advisor

- Device repair (phone / tablet / laptop), key-fob programming, and battery-pack rebuilds (soldering, tack welding).

KEY PROJECTS

Smart Sites — AI Site Generator

2026

Built an automated pipeline using web forms, n8n, and the OpenAI API that turns client intake straight into generated websites. Cut manual build work and setup time, letting the team stand up new sites with minimal hands-on effort.

Static Site Builds & Migrations

2025–26

Rebuilt and migrated client websites onto a fast, secure static architecture. Improved page load times and hardened security while cutting hosting overhead compared to traditional CMS setups.

Klaviyo Email & SMS Automation

2025–26

Implemented Klaviyo email and SMS marketing across client accounts — building automated flows, audience segmentation, and e-commerce integrations. Connected on-site behavior and purchase data to drive targeted, hands-off campaigns.

Cookie Compliance & Consent Management

2025–26

Deployed consent management and Google Consent Mode across client sites to keep analytics and ad tracking GDPR/CCPA-compliant. Standardized cookie banners and tag behavior so data collection stays lawful without sacrificing measurement.

EDUCATION

University of North Florida

2026

B.S. Computer Science · Minor in Business Management · Dean's List
